ONTARIO NUMBER 45

## Town Win and Loss In League Fixture

Bricks Win and Diamonds Lose In Games This Week

During the past week the two town football teams have entered into the second draw of the season's schedule and came out of it with a win for the Brick & Coal and a loss for the Diamond D's in the League fixture. The Brick's won their match with the Legion for top position.

In the game last Friday the Brick & Coal defeated the Legion by 4 goals to 1. Although they scored only one goal in the first half the Brick's put their test up early in the second half, and by the dazzling work of Houston and Kimer on the forward line, soon had the Legion well under cover with all the flaps down and the guy ropes securely fastened. One, two, three goals were scored in rapid succession and if it hadn't been for the Legion's passing around the California double-bent peanuts, pop-corn and pink lemonade, the Brick's score would probably have gone to four, five and six. During the interval the Legion caught Fairhurst busy wiping his lips from the last pink draught and slipped the ball into the net to save his team from a blank.

The game Monday evening between the Calles and the Diamond D's was more or less of a disappointment to the fans. From start to finish it lacked pep, excitement and finish and the 1-0 score at the end is a fair indication of the respective merits of the teams although it can be safely said that the Legion missed several opportunities to score. At the same time Calles supporters may think the same about their team. The game throughout was very much up and down the field with an utter lack of accuracy in passing and befuddled work when close in on the net. What both teams appeared to lack was an understanding of each other's play. This can be accomplished only by systematic practice. The Calles scored the only tally of the game when the first period was about half way through. Neither side scored in the second half and the game ended as above.

## Canada-Australia Trade Treaty Passed

IS MEETING WITH APPROVAL IN THIS COUNTRY

The new Canada-Australia trade treaty as announced in the House of Commons this week appears to be meeting with general approval throughout the country. According to figures submitted, Canada stands to be able to find a market in Australia for many of her products from the farm and factory to the value of \$630,000,000 annually. In return Canada has granted Australia a market preference for many of Australia's goods.

The completion of this trade agreement is in keeping with the stand taken by Australia and Canada at the Imperial Conference and if it works out successfully should go a long way towards encouraging cooperation in the large field of Empire trade.

## Advices Continuing July Summer Follow

And To Leave Ground Untouched During August

According to the Dominion Entomological Laboratory at Lethbridge, the moths which have been so numerous lately are not the pale western cut worm moth. As the cut worm moth will not be flying before August 1st the laboratory experts advise farmers to proceed as usual with summer follow work all through July, but to leave the ground untouched during August and the first half of September so as to avoid pest western cutworm losses next year.

More details information may be secured by phoning to the Dominion Entomological Laboratory, Lethbridge.

## Football Schedule

The following is the football schedule or the second draw in the League and Five Roses fixtures:

Tuesday, July 7th—Calles vs Legion—League.

Friday, July 10th—Legion vs Brick & Coal—League.

Monday, July 13th—Dominion Glass vs Calles—League.

Wednesday, July 15th—Brick & Coal vs Legion—Five Roses.

Friday, July 17th—Calles vs Dom. Glass—Five Roses.

Tuesday, July 21st—Legion vs Calles—Five Roses.

Wednesday, July 22nd—Dom. Glass vs Brick & Coal—Five Roses.

Friday, July 25th—Legion vs Dom. Glass—League.

Monday, July 27th—Brick & Coal vs Calles—League.

Friday, July 31st—Calles vs Brick & Coal—League.

Tuesday, Aug. 4th—Dom. Glass vs Legion—Five Roses.

Thursday, Aug. 6th—Brick & Coal vs Dom. Glass—Five Roses.

All games to be played on the grounds of first mentioned team.

\*\*\*\*\* COMMUNICATION \*\*\*\*\*

Redcliff, June 25th

To the Editor of the Review:

I have noticed with surprise

that no public acknowledgment

of the splendid services rendered

by Mrs. Stone and Mrs. Marlin

has been made.

Upon inquiry, it seems that

their letters or diaries were

simply bald statements without

even mention of a regret that

the board felt it necessary to

take the step they did.

Since they lacked this courtesy

I am sure that I am expressing

to opinion of all parents whose

children have passed through

the hands of these two

teachers when I tender my re-

spect that they are leaving us an

my sincerest thanks for the car-

and skill with which our children

have been taught by them.

Yours very truly,

A Parent

A commission appointed to in-

vestigate the moving picture

business finds that a combina-

tion of law, exists, as a con-

sequence of which pictures of

British origin are crowded out

of Canada. Each province will

now have the power to take steps

to remedy this "evil".

## Popular Citizen Leaves The Town

E. H. Waloff Transferred to Plant At Hamilton, Ont.

Ed. H. Waloff, who has been associated with the Dominion Glass plant here for the past fifteen years, as head machinist and superintendent, left last Friday for Hamilton, Ont. to which point he has been transferred by the head office of the company, to join the staff in their plant there. Few men in Redcliff would be more greatly missed than Ed. Waloff. Although of a quiet disposition he has made a host of friends by his fair dealings, integrity, strict attendance to business and loyal devotion to the interests of the company, with which he has been associated since joining it when a lad, as a steady, capable and efficient employee, he has given of his best to his employers and at the same time won the respect and esteem of all who worked under him. The earnest wish of his many friends here is that his removal will mean another step upward on the ladder of distinction in his line of work. Mr. Waloff and family will follow him to Hamilton in the course of the next two months.

Before he left the employees of the plant presented him with an excellent club bag as a mark of the esteem in which he was held by the men.

John Jackman and his son, Jack, were visitors in town this week. They motored over from Seattle. Mr. Jackman will be remembered as the popular jitney driver here 8 years ago.

Mr. Carlson, of Alderson, was a visitor in town for a few days this week.

Mrs. Padley, of Edmonton, formerly Mrs. Frost of Redcliff, was a visitor in town this week.

## Legion and Bricks Tie In Five Roses Cup

Only One Goal Scored in Each Period

The Legion Uniteds and the Brick & Coal played a 1-1 draw here last evening in the Five Roses fixture.

Although the game was fairly evenly contested throughout throughout the evening goals made in more or less exciting.

The Legion took possession from the face off and in less than two minutes Thompson scored a nicely placed header from Phillips. From this to the end of the period the Bricks tried hard to equalize but their periodical rushes were foiled by the Legion defence, and the period ended 1-0 for the Legion.

The second half started much the same as the first except that the Bricks got control and after two minutes of snappy work Kimer drove in a hot one that gave the side a chance.

From this on both teams tried hard to break the tie and although the Bricks had a slight edge on the play they were not able to make the last few yards of the stride and the game ended in a draw.

Flour For Drought Area

The Dominion Government has decided to direct the purchase of 2,000,000 bushels of wheat to be ground into 450,000 barrels of flour, which will be available at a low price, with bran and shorts, in drought areas in western Canada; premier Bennett announced in the House of Commons Monday.

## Report Shows Town In Healthy Condition

Request For Reservations For Industrial Sites

There was a quiet session of the town council last Monday evening.

A letter was read from the health department re the last inspection of the town by the health officer. The report showed that the town is in good condition so far as cleanliness is concerned, and that all business places, butcher shops, dairies, restaurants, ice cream parlors, water supply etc. are conducted in a satisfactory manner.

The accounts as passed by the finance committee were approved for payment. Dominion Greenhouse wrote offering \$75 for bld. Chadwick store on first street. The matter was left over for investigation.

Constable Kitchen asked for holidays from July 15th to 30th. The request was granted.

W. H. Gray wrote council asking for reservations of industrial sites along a spur track running north to Brick & Coal plant, and also the old truck factory building, as negotiations were under way for locating other industries in Redcliff. Council was unanimous in assuring Mr. Gray co-operation in his undertakings.

Mrs. Carlson, of Alderson, was a visitor in town for a few days this week.

Mrs. Padley, of Edmonton, formerly Mrs. Frost of Redcliff, was a visitor in town this week.

## Redcliff Team in Soft Ball League

First Game Here Friday Evening of This Week

A Redcliff soft ball team has entered a league made up of five teams in Medicine Hat and Redcliff.

A schedule has been drawn up which provides for scheduled games from now till Sept. 16th.

Redcliff team went to the Hastings event at the Hastings Molineaux R. & R. and went down to defeat, although they put up a good game for their first experience away from home. Redcliff plays their next game in Medicine Hat. A gainst the S. A. R. on Friday evening of this week. They play the Moose here on Wednesday, July 22nd.

All games here will be played on the baseball diamond near the stampeed grounds. This is a good game for spectators. Don't miss seeing them.

Is your Subscription paid?

## Here and There

Feeding tobacco to sheep is the latest device to check internal parasites. The tobacco is mixed with salt in the proportion of ten pounds of salt to one of crushed tobacco leaf.

Latest available estimates place Canada's forest resources at 234,304 million cubic feet of standing timber, capable of yielding 634,687 million feet board measure of sawn lumber and 1,121,992 thousand cords of pulpwood, plus poles and other smaller materials.

Western Canadians are showing increasing interest in the pulp and paper industry. His Excellency the Governor-General, who with the Hon. Arthur Meighen and Major Delam have been staying at the Banff Springs Hotel.

Trail riding in the Canadian Rockies has made a strong appeal to Lord Dunscombe, His Excellency the Governor-General, who with the Hon. Arthur Meighen and Major Delam have been staying at the Banff Springs Hotel.

Intensive campaigns against grasshoppers, wireworms, wheat stem sawfly, cutworms, Colorado beetle, cabbage butterfly, root maggots are being conducted throughout the west this summer and fall with a special organization in the field.

"Buyers' Week," which has been a great success in the past, will be held for the fourth time in Montreal commencing August 19 next. At the last one in February upwards of 1,100 buyers came to Montreal and purchased in figures \$550,000 worth of Canadian-made goods.

A man catching a fish is not news unless the fish is an eel, but a fish catching a man is a big type head. This happened at Lake Minnawanka, near Banff, recently when an angler was pulled off the pier into the lake by the sudden strike of a monster eel. Constable James McCallum put off in a boat and fished both fish and fisherman.

Six days, nine hours and ten minutes was the time of the record run of the "Empress of Japan," 25,000-ton flagship of the Canadian Pacific fleet, on her last trip from Vancouver to Honolulu, while a double record was made when the same ship completed her voyage from Honolulu to Victoria in four days, nine hours and 15 minutes.

For the second time in the past three years, Canadian Pacific Railway police are all-Canada revenue champions. The railway's Ontario team defeated the Royal Canadian Mounted Police, of Lethbridge, in the final for trophy recently. The railway police scored 1410 out of a possible 1500 points the Montreal 1352 and the London Dominion Open 1500 against the Ontario team.

Hon. Gordon S. Harrington, Premier of Nova Scotia, and two hundred of the province's leading citizens, gathered at Yarmouth June 16 for the opening of the new railway line. This history is the third time that a new line has been opened by the railway in the past three years. The new line is in the historic town of Yarmouth, in the province held by the Canadian Pacific.

## Music in the Rockies

Music of an exceptionally high order will be provided for guests at the Canadian Pacific Railway's famous Banff Springs Hotel, in the heart of the Canadian Rockies, this summer, by singers from the well known Musical Comedy Organisation, under the direction of Alfred Heather, an outstanding feature of the hotel's last winter. A light opera company has been organized, which will not only offer a carefully selected program throughout the season, but will broadcast special themes, such as Music of the Mountains, Music of the Flowers, etc., during the C. P. R. Friday evening radio hour of music. During the summer, Gilbert and Sullivan's "H.M.S. Pinafore" and "Trial by Jury" selected scenes from "Hazel" and "Gossamer's" "Faust" and three Canadian ballads offered up music by Dr. Ernest MacMillan, Dr. Henry Wilson and R. G. Macdonald, all of Toronto, will be rendered.

'Fresh from the gardens'

### Don't Be Critical

There are two kinds of criticism,—one that nowadays we refer to as "constructive" criticism, and the other that in common parlance we term "destructive" criticism. To be exact, the word criticism should not be employed in connection with the latter.

Criticism is a fine old English word which in its pure significance, so a recent writer has pointed out, implies carefully weighing and balancing; fine, exact, authoritative judgment. Needless to say the heading over this article does not refer to such true form of criticism.

In modern usage the word has been debased, and divorced from its true meaning. Today its implication is not to take the measure of something or some one, but rather to point out, dwell upon, magnify the defects of something or some one. The tendency is not to balance, but to distort; to become cynical, to carp at, to indulge in wholesale fault-finding, to seek to destroy what is rather than to help for betterment. It is in this sense we say "Don't be critical."

In so many respects people are the product of their environment that it takes an unusually strong person to stand erect and breast the swirling tide of current opinion. When times are prosperous, business booming, stocks and bonds mounting ever higher, when nine out of every ten people are optimists, many of them merely because it is the fashion to be so, they become extremely critical of the person who advises caution. Such a person is characterized as a non-progressive, labelled a back number, when as a matter of fact he may be more truly progressive, more far-seeing, more of a real builder than those who deride him.

Reversing the picture, we find in these present days that the vast majority of people are pessimistic and because conditions are admittedly not good they are critical of and would destroy the very institutions under which they developed and enjoyed their former prosperity, and they now denounce those who again urge caution and a carefully weighing of all the facts before taking a leap in the dark; they are impatient with and critical of all those who advise sane, clear thinking and careful, well-thought-out action rather than wholesale destruction of that which has gone before.

Environment, too, has a great deal to do with our pet prejudices, and prejudice is the fruitful source of many of the very large percentages of harmful criticism. It is only the accident or circumstances of birth that makes a person one of the white race rather than a negro or an oriental. Many a staunch Protestant has been a zealous and ardent devotee of the Roman Catholic and thus the object of the criticism and scorn he now pours out on others, or he who now insists he belongs to the only true church might have been born one of those he now regards as a heretic, or even a heathen savage.

The circumstance of birth has placed some men on thrones, or in positions of luxury and wealth, while others have been born to slaves and into dire poverty. Each man may be doing his duty as he sees it, honestly and fearlessly, striving for individual, community and world betterment, but neither the one nor the other has the right to look condescendingly on his fellow man nor deride him. They may not agree upon what constitutes world betterment, and each has full liberty of action to strive for the attainment of that in which he believes or desires. Constructive teaching and action looking to the realization of desired ends is praiseworthy and should be indulged in, but narrow, bitter, illogical criticism, purely destructive in its nature and intent, is not only deplorable and to be condemned, but, in the final analysis, it is futile.

What this old world needs, probably more than anything else, in its present stage of development, is a more universal acceptance of the meaning of the good old English word, "criticism." People need to discard their thinking process, their words written and spoken, their actions; they need to subdue their passions, curb their prejudices, look beyond their environment; make it a word, in business or government, in connection with teaching and intimate social intercourse, there is imperative need for careful weighing and balancing, for fine, exact, authoritative judgment. Prejudice and selfishness require to give way to reasonableness, a willingness to recognize and study the other fellow's point of view.

That is, the world needs today, as it has always needed and always will need, the application of the Golden Rule, the spirit of co-operation, in the every day activities of our life, the more activities great or small, vitally significant or relatively unimportant.

### Postpone Trip Until Winter

#### Trans-Canada Auto Travellers Decide To Wait Until Mauts Frozen

The "Nova-Columbia," powerfully constructed auto, which has been attempting the first trans-Canada journey by the automobile route, will lay up at Port Williams until the middle of the summer. Decision to halt the hazardous trip until winter forces harden the treacherous mud roads in the Kenora Lake district, has been arrived at by the drivers, Charles McKenney and Gus McDermott, because they cannot negotiate a day's journey under present conditions. The platters of trans-Canada motor travel started out from Halifax in the summer, and have covered 2,000 miles of the 4,000-mile trip. It is estimated the trip will not be completed before 1932, as all of next winter will be required to get through the thick bush and muskeg country.

Dr. Johnson wrote his dictionary in nine years. The French Academy of 20 members spent 40 years on a rival work.

## The Mother of Seven Children Used It for Diarrhoea

Mr. Ray Hinkwater, R.H. No. 2, Hagerville, Ore., writes: "I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die. I gave her 7 miles to see what my sister had given her baby, and he came home with it. My father's friend of Wild Strawberries, I gave her one of your bottles and she was soon well again. My other children had had diarrhoea at that time. I gave them 'Dr. Fowler's' with the same result."

### Manitoba Visions

#### Huge Power Project

#### Would Be Great Benefit To Province

A likely means of balancing agricultural and industrial development in Manitoba was pictured by Premier Bracken in his address to the Young Men's Section of the Winnipeg Board of Trade, recently, on "The Feasibility of the Dauphin River as a power development scheme." Properly developed, the Dauphin River project would be the largest individual development in Manitoba, and would increase the power resources of the province by probably 400,000 h.p. It would round out the whole power situation in Manitoba; assure all parts of the province of a supply of low-priced hydro power for many years; facilitate the development of industry in urban centres and of municipal services in the rural centres with the possibility of adding 10 per cent. to the industrial future of the southern part of Manitoba.

### Amish Menonites Ban Radios

#### Claish Them With Musical Instruments Set By Devil

Bringing the extremely strict tenets of their creed up to date, the Amish Menonite conference at Waterloo, which concluded a three-day session at the Mapleview church, Waterloo, near Elkhart, Ontario, has decreed that radios must be banned from all Amish Menonite homes, the sect classifying radios with musical instruments as being barred since the sect was founded.

Musical instruments, along with many other modern luxuries and even some so-called conveniences, are banned from Amish Menonite homes. Menonites as being instruments of the devil designed to lead the faithful into error and away from the Almighty. Penalty for violation of the ban on radios in the home is excommunication from the church.

### Would Cancel Certificates

#### One Hundred and Seventy Naturalization Certificates May Be Cancelled

Cancellation of 170 naturalization certificates which were obtained fraudulently has been recommended by Judge J. G. Wallace of Woodstock, Ont., who investigated many cases in Montreal and Toronto last April. The cabinet is considering the report at the present time but it is expected the recommendations will be followed. Consideration also is being given to the instituting of criminal charges against those involved and to deporting them from the country.

### Stop the Cough...

Coughing is caused by irritation in the respiratory passages and needs to be relieved. Obstructions that come from inflammation of the throat and lungs. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the coughing and the coughing will stop. Try it and you will be satisfied.

### Eals Poison Weed

#### Saskatchewan Wild Fires From Eating

After getting some wild prairie, which he found near his father's farm, Gregory Kotek, son of a well-known farmer of the Foam Lake district, died before medical assistance could be obtained. No insect was considered necessary, the youngster having told his parents what he had eaten.

Wild prairie are deadly poison, even when cooked. Recently the University of Saskatchewan agricultural authorities issued a warning against eating this weed.

Douglas' Egyptian Liniment is a quick, certain remedy for insect bites or Thrush. Four or five applications are usually enough.

### War Veterans Leave Hospital

After spending 13 years in hospital receiving treatment for an arm ailment received during the Great War, Corporal Roy Brown has left Christ Church Military Hospital, Toronto, cured. Corporal Brown, who entered a hospital at Boston, Mass., shortly after the war, came to Toronto and entered Christ Church Hospital in 1917.

### Business As Usual

An insurance agent has outwitted his welcome in a merchant's office, and took no notice of the many broad hints that he was making himself a nuisance. At last his victim got him by the ear of the neck and pitched him downstairs. The man got up, retrieved his hat, and turning to the clerk at the top of the stairs, he said calmly, "Looking after, what about that insurance policy?"

The farmer is not unemployed. Just unpaid, that's all.

W. N. U. 1932

### Seaport Taking Form

#### Men Are Working Day and Night At Churchill

Two thousand men, working in day and night shifts, are employed at Churchill, terms of the Hudson Bay Railway and Manitoba's new seaport, and the town is "sprouting a skyline," reports Mr. W. B. Chubb, Provincial Minister of Public Works, who returned from the northern port.

A seaport, equipped with all modern facilities, is taking form on the shores of the great natural harbor of Churchill, with the hundreds of men working on elevator and dock construction.

The steel fabric of the grain elevator, which will have a capacity of 2,500,000 bushels, stands out against the clear northern sky, said Mr. Chubb. Hundreds of men are busy building the dock where during the shipping season of future years ocean vessels will take on cargoes of Western Canadian grain and livestock of Old Country ports.

Mr. Chubb and Hon. Donald G. McKenna, Minister of Mines and Natural Resources, inspected the future port, whose steel and iron will be surveyed and laid out this summer.

### Ekimons Ride In Truck

#### First Automobile At Churchill

Wearily pedestrians who travelled north to Manitoba's new seaport at Churchill, were glad to see the first automobile was started recently on its ploughing through the heavy mud of this settlement the first car north of 59.

The heavy two-ton truck is being used in freighting the supplies of the Roman Catholic church from the station to their various missions along the west coast of Hudson Bay. Abolition of the trucking company, and Indians gathered around the truck gazing with awe as it ploughed through the heavy mud. It was a considerable time before any of the Ekimons could be convinced it was safe to ride in the machine.

The young Indians and Ekimons who rode in the back of the machine were looks of rapt wonder as they joined along the trail.

### Recipes For This Week

#### (By Betty Barclay)

#### TRANSPARENT PIE

- 1/2 cup butter.
- 1 cup sugar.
- 1 egg, well beaten.
- Grated rind 1 orange or 1 lemon.
- 1 baked 9-inch pie shell.
- 2 cups shredded coconut.
- 3 eggs whites.
- 6 teaspoons sugar.

Beat milk, cream, egg yolks, and salt together very thoroughly for about ten minutes. Add orange rind. Turn into pie shell. Sprinkle with 1 cup coconut, and bake in slow oven (300 degrees Fahrenheit) 30 minutes. Bake in shallow white tin. Sprinkle with milk and beat until mixture stiffens again. Pipe lightly on filling. Sprinkle with remaining 1 cup coconut. Bake in moderate oven (350 degrees Fahrenheit) 30 minutes, opening door after first 8 minutes of baking period.

#### LEMON CREAM FILLING

- (sufficient for 1 three-layer cake.)
- 1 egg.
- 1 cup sugar.
- 4 tablespoons cornstarch.
- 1 cup water.
- 1 cup lemon juice.
- 1 teaspoon grated lemon rind.
- 1 egg white.

Beat egg, add sugar and cornstarch. Mix well. Add water, lemon juice and rind. Cook in double boiler 15 minutes, stirring frequently. Add butter. Cook before spreading on cake.

Persian Balm is unrivalled for promoting feminine loveliness. It tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hands flawlessly white. It is especially recommended to soothe and relieve roughness or chaffing caused by weather conditions. Indispensable to every dainty woman. Cool and refreshing. Delicately fragrant. Magic in results. Never leaves a vestige of stickiness. Persian Balm is the one toilet requisite for the woman who cares for character and elegance.

#### Have Better Chance

The family which possesses a piece of land and will work it so that it will produce the things they must have to live on, will have a better chance off than the general run of population of the towns and cities, even though they may not be out of unemployment now. It is a little harder but plenty for the farmers but who are not without something with which to pull, as is the case with the unemployed in the cities.

## When a Laxative Gripes

### —BEWARE!

Severe abdominal pains, griping, cramping, and constipation are indications of unnatural strain that may cause serious injury. No laxative that causes such discomfort is safe, or necessary.

A daily dash of Epsom's "Fruit Salt" in a glass of water, night or morning, loosens up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

### Important Office Abolished

#### Nova Scotia Government Does Away With Representative In London

#### England

Tuesday, June 20 will see the end of the longest record of official representation in London, England, that any part of the overseas Empire has known.

In 1761—one hundred and seventy years ago—John Mauer was appointed agent-general for the Empire capital by the Nova Scotia Government. On June 30 Miss Jean H. Howard will relinquish a post terminated by the present provincial administration. Henceforth Nova Scotia's affairs in Great Britain will be handled through the Canadian High Commissioner's office, according to announcement in the House of Assembly this year.

Economy was the motive which led to abolition of the office. The point is that the Nova Scotia Government in abolishing the office is that the province's interests are acknowledged adequately by the Canadian High Commissioner's office. By the railways, as by immigration is concerned, and by the trade commissioners. The saving will be about \$25,000 annually.

### Cloud Of Insects

#### Visits Alaskan Island

#### Report From Wrangell States All

#### Vegetation Was Destroyed

A despatch from Wrangell, Alaska, states that a cloud of insects which filled the skies to such density that they could be grasped in the air by the handful, visited and destroyed vegetation on Vank Island.

F. G. Smith, a fox farmer, said the insects were borne to the island by a southwest wind. He described them as about as big as ticks, and with red legs and a head and mouth resembling an ant.

They were as thick as locusts and shrubs, eating a single hole in each leaf, he said. Strawberry blossoms turned black later.

Fish that died millions of years ago are said to be the modern progeny of searching for water far underground.

### REMNANTS

#### REMNANTS—3 lbs. Prints, \$1.00; 2 lbs. Silk, Velvet or Cretonne, \$1.00.

Agents, dealers write for list. Write the Regina (Vancouver) Leader-Post.

### And There Are Fists

Someone wants to know whether a fellow who drops money on the stock market is a bull or a bear. Sometimes the Regia (Vancouver) Leader-Post.

### Put Down Food Waste

#### —by covering all perishable goods with Para-Sani

Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

### Cut Down Food Waste

#### —by covering all perishable goods with Para-Sani

Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

### You'll find the Para-Sani

## Motor Car

### Accidents

Ways Must Be Devised To Control The Roadless and Unsafe Driver

The nation stands aghast at the terrible toll of lives taken in motor car accidents and by the mounting number of injuries. Both are increasing, despite the efforts of the public authorities who regulate motor traffic, who seem at their wit's end in regard to curbing the slaughter and maiming. It is hardly an extreme statement to say that automobile traffic has "gotten out of hand."

Testing of cars as to their fitness for use, in regard to the condition of their brakes, headlights, steering gears and the like resorted to by a readily available "expendable" has proved of some slight benefit, but has not altered the tragic aspect of the situation in any material degree. Everyone knows—the "powers that be" best of all—that the all-important factor in the present critical juncture is the driver, and how to weed out the unfit ones is a problem which is thus far unsolved. It must be solved, however, for the considerable degree of security for users of the highways can be attained, even though highly drastic measures have to be adopted.

Some means must be devised and applied to determine the fitness of applicants for licenses, as to their physical qualifications and their character, judgment, skill behind the wheel, and so on. The "test" of this must include old drivers as well as prospective ones. How to put this reform into effect, in a practical manner, has not yet been determined, but the problem is receiving attention. It is being proposed to subject the applicant to a specialized form of examination of the general type of the "intelligence test" now given to the applicants, asked are so framed by psychic experts that their answers may be expected to throw out the mental incompetency of the candidate as to enable his fitness as an operator to be determined.

How far such an examination can go in connection with other more usual tests to furnish a criterion for acceptance or rejection of the applicant is problematical, but this proposal is at least a most interesting one.

### Buyers Of Canadian Wheat

China Is Increasing Her Purchases Of Wheat From Canada

Twelve countries took wheat from Canada by the extent of 1,000,000 bushels and more during the nine months ending with April, 1931, or the crop year to date. "The Big Twelve" are the same as in the preceding year. China, however, moved nearer the top, having increased her purchases considerably in the last year. The leading buyers of Canadian wheat are enumerated by the Dominion Bureau of Statistics as follows: Great Britain, 97,465,117 bushels; Italy, 8,614,508 bushels; Belgium, 8,478,408 bushels; France, 8,457,371 bushels; United States, 7,725,035 bushels; China, 7,368,442 bushels; Japan, 6,282,256 bushels; Netherlands, 6,134,121 bushels; Germany, 4,218,367 bushels; Greece, 4,032,880 bushels; British South Africa, 2,535,100 bushels and Sweden, 1,292,654 bushels. An even dozen countries took 75,000 barrels of flour from Canada, or more, in the nine months ending with April 1931.

### Waiting Nest Chance

"I hope you like your new home. I expect you're very happy!" said a visitor, who had called on a man who had recently arrived in Victoria. "Oh, I like it well enough." "Have you called on your next door neighbors yet?" continued the visitor. "No, I haven't, yet," said the new arrival. "But I shall do if I continue to miss any of my special rose trees or any more of my sweet pea sticks."

"There are three roses to give to two women in the Hawaiian Islands."

Italy's unemployed now totals only 750,000.

Manitoba Plans North Survey  
Manitoba plans to survey an area west of where squatters live at Cranberry Portage, 40 miles north of The Pas in northern Manitoba. Settlers whose interests require them to live on land adjoining the Lake Athabasca will be taken care of, according to R. W. Giles, director of provincial lands. Squatters will be dispossessed if their land lies within the range he surveyed for Cranberry's new site.

Cattle Shipments To Britain  
Last year 5,400 cattle were shipped to Great Britain from Canada, according to Hon. Robert W. Millie, Minister of Agriculture. In 1929, none were shipped, while in 1928 the number was 405. In other years, from 1923 the totals were: 1923, 97,642; 1924, 79,435; 1925, 110,868; 1926, 79,885; and in 1927, 8,263.

"You know the poor wretch?"  
"No, but I never could see a poor chap holding out his hand without shaking it,"—Le Montague, Charles.

## Ant Has Nothing On Hen

### Only Time They Are Not Busy Is When On The Road

No one has yet given the British Columbia hen the recognition due her. At Agassiz and Saanichton official apportioning of the food supply and several hundred birds are adding to the fame of British Columbia laying strains, says the Vancouver Province.

These hens don't care whether eggs are bringing a good price or not. They put the same energy into the task whether eggs are 37 or 70 cents a dozen.

Bad weather may be an excuse for some men not to work but wet days at Agassiz or Saanichton find 19342 laying her eggs as cheerfully as on dry days.

Overproduction of commodities may worry a mere man; surplus of nice eggs would never worry a hen. Our hens do not desire a five-day week, a five-hour day or a five-penny wage. The only time they are not busy is when on the road. The only time they are not contented and are discontented, rather than to click over a brood of inquisitive young chicks.

Solution in ancient days pointed to the ways of the hard-working ant as worthy of consideration by men who would not, each time, be writing Proverbs in 1931. He undoubtedly could find in the records of performance of the British Columbia hen material for inspiring present-day "slogans" into activity. A hen may deliver a speech and luncheon lectures may predict early return of more prosperity. While the ant may be able to keep itself capable of making definite, concrete contributions to human welfare, the hen, on the other hand, would make the world a worthless example.

### Both Were Poetical

Farmer and Railway Company Cor-

porated in Yonkers  
A farmer living near the railroad lost one of his roachback hogs, which was killed by the train. He wrote the company a letter, asking them to request them to send enough money to pay for the loss of his hog.

My roachback strolled down your track a week ago today.  
And 49 came down the line and snuffed his life away.

No fault of me, the hog, you see, slipped through a cattle gate.

So kindly send a cheque for ten to debt to liberate.

In a few days he received the following answer to his letter:

Dear Sir:

Our 49 came down the line and killed your hog, we know.

But roachbacks on railroad tracks quite often meet with woe;

And my friend, we cannot send the cheque for which you pine,

Just plant this death plant over his head.

"Here lies a foolish wretch."

### Thirty Miles Of Dock

Famous Structures Stretch From London To Tilbury, England

London docks, scattered from the River Thames to the Thames estuary, are as far as the Tilbury Docks, the nearest port to the sea, includes very famous and important structures.

Passing through the Tower Bridge at London, on the Thames, one approaches first the entrance to the London dock, St. Katherine Docks with their lofty warehouses. Large quantities of many of the most valuable commodities from all parts of the world are stored here. More than 60,000,000 fathoms of wool pass through these docks every year. The Port of London Authority keeps a staff of experts to perform such necessary operations as weighing and sampling.

### Manitoba Plans North Survey

Manitoba plans to survey an area west of where squatters live at Cranberry Portage, 40 miles north of The Pas in northern Manitoba. Settlers whose interests require them to live on land adjoining the Lake Athabasca will be taken care of, according to R. W. Giles, director of provincial lands. Squatters will be dispossessed if their land lies within the range he surveyed for Cranberry's new site.

## The Cause

### Must Be Cured

Only Way To Stop Woes Is To Cope With Them

Twelve thousand pastors urge a Church ban on war. That sounds large, but it was the response to a questionnaire sent out by Dr. Caudman, Dr. Froelich and others to 53,000 ministers of whom about 20,000 replied. So really only about a quarter of the ministers consulted came out for a ban on war.

But if there were four times as many would it have made much difference? It would be hard to find a group of people who would not want to do away with war if they could. The clergymen do not think about it any differently from most other people and their ban if it could be got would not be of much use. To stop war one needs to examine into the causes of it and try to cure them. That is the job of economists, bankers, and politicians, rather than of clergymen. Of course a clergyman may be good at it, but his real errand is to fight war by strength won out of the living world of change and improve the minds of men, make them wise, civilize them.

### Better Markets For Beef

Canada Regulating Trade Says Saskatchewan Minister Of Agriculture

Canada is regaining her export market for beef, says the Hon. W. C. Buckle, Minister of Agriculture, who returned to Regina following a series of visits to the United States and the Dominion of Ottawa on departmental business.

Mr. Buckle added that the Dominion would have a greater volume of export in meat, but ships suited to the trade were few and transportation companies were loath to make changes in livestock ships on account of new regulations coming into effect this fall in the Old Country.

It is expected, however, that ships will be made over to carry on the trade and the momentum gained this spring will continue.

Mr. Buckle stated that while in the east he found farm conditions improving, but that the people were anxious about the outlook in the west.

### The Real Cost Factor

Thorough Cultivation and Efficient Farm Practice Necessary To Succeed

In order to reduce production costs of live stock and live stock products, high acre yields of home-grown feeds are the prime requisite, animal husbandry experts of the Dominion Department of Agriculture assert. One must measure the milk production of the herd not as so many pounds per cow, but per acre of land that grew the crops that in turn fed the herd.

Only then will they exist in proper relationship. This means thorough cultivation and efficient farm practice—better than ever before.

### Attend Funeral In Four Hours

Wearing plus fours, fishermen attended the funeral of Elgin, Scotland, of Major James Grant, millionaire distillery owner, who died recently, aged 84. Major Grant expressed a dying wish that there should be no mourning at his funeral, and that his workmen should attend in their ordinary working clothes. They were taken to the ceremony in a special train.

What's in a name? Jumbo was once an elephant and now he is peanut.

Of all the known metals, only about one-third are being commercially utilized.

## The Community Newspaper

### Does Its Job Honestly and Nothing But the Truth Is Its Aim

The local newspaper is and always will be the dependable and constant contact between the world and the community. The great responsibility daily, the radio, the magazines have their places and important places they have, but there is only one through contact if one wishes to reach any locality with either news or advertising and that contact is the community newspaper.

The local newspaper speaks with authority for and to its neighbors. It commands the confidence of those who buy it; it is welcomed into the home. Its message carries the weight of words from an invited guest. It does its job honestly and with the knowledge that it is talking to people who know where and with whom the responsibility for its statements rest. It is not a great big theatrical thing with its actors behind scenes and its plot of responsibility obscured by unwholesome persons and sections by-lines. Every city and community would while has one of these newspapers. It may be in a city of a half million, for neighborhoods is not altogether gone from even the larger cities, or it may be in a progressive little community of a few hundred souls. It is the point of contact, the forum, the auditor, the friend of the community in which it is published. That community which does not cherish and completely support its local newspaper is not a community.

It is not a great big theatrical thing with its actors behind scenes and its plot of responsibility obscured by unwholesome persons and sections by-lines. Every city and community would while has one of these newspapers. It may be in a city of a half million, for neighborhoods is not altogether gone from even the larger cities, or it may be in a progressive little community of a few hundred souls. It is the point of contact, the forum, the auditor, the friend of the community in which it is published. That community which does not cherish and completely support its local newspaper is not a community.

### Red Stain In Jack Pine

Whether It Continues After Seasoning Is Being Investigated

Red stain developing in standing jack pine as a result of infection by certain fungi. Whether or not these fungi continue to develop in the wood after it has been placed in service is a question at present being investigated in the division of timber pathology of the forest products laboratories of Canada. Joseph S. H. Macdonald, of the Interior. It has been determined by analysis of selected red-stained jack pine railway ties that the staining fungi may resist air-seasoning of the wood in which they are growing for a period of two years, and that in such air-seasoned ties they may, in addition, survive concrete treatment. A test track has been set out at the present under study to determine the reactions of red-stained wood to service conditions.

### Death Of Pioneer

Frederick Poole, aged 85, originally of the West Mounted Police who tracked to Fort McMurray in 1874, and held post Fort Walsh in 1876, died recently at Prince Rupert. When he was a native of Quebec, was a Fenian veteran and rancher for many years in the Alberta foothills.

### Jaeger National Park

A great part of Jaeger National Park in Alberta is as wild as when the white man first entered the Athabasca parks. The few motor roads have been restricted to the valleys with short lateral extensions to Maligne Canyon, Mount Edith Cavell, etc.

### The Hirsute Appadage

Efforts Being Made To Restore Whiskers To Their Former Glory

The editor of the Bault Star, Mr. Star offers a suitable trophy for the most pleasing set of whiskers displayed at the Dominion Day celebration. "Anyone possessing a set of robust Calverys should line up on Dominion Day and thus show his sympathy with the idea of re-stablishing in Algoma the glories of the chest protector area, now unappreciated by the Dominion Department of the Interior. The trophy will be awarded to the man whose whiskers are the most pleasing set of whiskers displayed at the Dominion Day celebration. "Anyone possessing a set of robust Calverys should line up on Dominion Day and thus show his sympathy with the idea of re-stablishing in Algoma the glories of the chest protector area, now unappreciated by the Dominion Department of the Interior. The trophy will be awarded to the man whose whiskers are the most pleasing set of whiskers displayed at the Dominion Day celebration. ## FREE BOOKS ON CHILD WELFARE

HERE are many times when you have heard of the need for better feeding, clothing and shelter for the poor and unfortunate. Now you can get the facts and figures on child welfare, and how to help them.

## Eagle Brand Condensed Milk

The Borden Co. Limited C-19  
115 Queen St. W., Toronto  
This booklet is free of charge. It contains a full description of the Borden Condensed Milk and the Borden Condensed Milk Co. It is a valuable reference for all who are interested in child welfare.

## WORLD HAPPENINGS BRIEFLY TOLD

Twelve Communists, supposedly including several important leaders, were executed at Hankow, China, by order of the government.

Allegations of dumping of Russian clothing in Canada have been denied. It is demanded that Canadian suit makers get more tariff protection.

Donald T. MacMillan, explorer, says he doubts if he will carry out his announced plans to fly from Labrador to London this summer.

Admiral of the Fleet Lord Roger Keyes, hero of Zebrugga and the man who held the Straits of Dover during the Great War, has resumed his active career in the Royal Navy.

After years of danger in the air, Antoine Pullard, aviator, died in Paris at the age of 36, following an operation for appendicitis. He held many records.

The proposed rendezvous in polar waters between the Graf Zeppelin and Sir Hubert Wilkes' submarine "Nautilus" has been called off because of the breakdown of the undersea boat.

The report of Hon. Herbert Marler, Canadian minister to Japan, on trade possibilities in the Far East, will not be presented to the House of Commons.

Felix A. Sullivan, an embalmer, who officiated at the funeral of Queen Victoria and embalmed the bodies of President Grant and President Garfield, died in Los Angeles, recently in his 88th year.

The Bank of Montreal agency in New York recently received a shipment of \$3,000,000 in gold from Canada. The shipment is the first to be received from Canada since midwinter.

Clayton Scott, chief pilot for the Great Air transport, brought his Argonaut plane down onto Elliott Bay, returning from Juneau with the record of having made the first non-stop flight to Alaska, by night.

## Shows Faith in Canada

Sum Invested in Her Industries Is Over Six Billion

The impressive fact that the sum invested in Canadian industries is no less than \$6,000,000,000 is mentioned by Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain, in a foreword to the "Canadian Resources Supplement" published by the Financial Times of London, England. Still more impressive, he says, is the fact that some contributions from outside sources are held in proportion of 61 per cent. by the United States and 39 per cent. by Great Britain.

Detailing a further reason to indicate the "extraordinary resilience of Canadian industrial activities during the period of some world wide depression," Mr. Ferguson records as another impressive fact that building contracts during the first ten months of 1930 totalled \$40,000,000. He says, "this hardly looks like rationalism or resignation to depression. Building contracts in this scale are as reliable an indication of Canada's prosperity as any that can be found."

## St. Lawrence Route Is Popular

Enterprise and Confidence in the Development of Canada's Future

The growing popularity of the St. Lawrence route from America to Europe has received another impetus with the placing in commission of the "Empress of Britain," said by competent authorities to be the finest vessel afloat. On her first trip from England to Canada the "Empress of Britain" carried a very notable passenger list and marked another step forward in the popularization of the St. Lawrence route to Europe.

Although not the largest passenger vessel ever launched—the "Empress of Britain" has a gross register of 45,000 tons—the new vessel is said to present the latest developments in mechanical architecture, designed to insure comfort, safety and speed. Among innovations are a full-sized tennis court, a squash racket court, long distance telephone in every first-class apartment, and every room an outside room. Her speed will enable her to make the passage between Southampton and Quebec in about five days.

The St. Lawrence route has the advantage of furnishing an ocean journey to Europe with the first thousand miles consisting of placid waters enclosed by magnificent scenery. The new vessel will reduce the operational period of the voyage to 34 days. She is the property of the Canadian Pacific Railway Company, and may therefore be fairly claimed as an evidence of Canadian enterprise and confidence in the development of Canada's future.

## Winnipeg Newspaper Union

The bill is drafted to conform with the Convention of 1928. Parliament has given third reading to it amending the Copyright Act, approving the final three clauses in short time. Nine clauses were passed in committee. The bill went on to the Senate.

Piloting the bill through the House, Hon. C. H. Cahan, secretary of state, said he hoped a thorough revision of the copyright law might be undertaken but indicated it would require "a great deal of time."

The bill is drafted in order to bring the present copyright law into conformity with the Rome convention of 1908, and Canada is required to do this country's adherence to that convention by July 1. In general its purpose was to extend the provision of the copyright so as to embrace radio broadcasting and cinematograph reproductions, these developments not being in existence when the original Berns convention was drafted.

As the bill operates, individuals who have not registered their works will not possess the right of suit in court in respect of such unregistered works. In the case of assignment having been made, only such assignments as have been registered will vest in the assignee whatever court rights are established. Unregistered assignments will have no status before the courts.

Organizations to whom copyright works have been assigned and who charge fees for the performance of such works will be subjected to government regulation if, after an enquiry by a commissioner under the Enquiries Act, it is shown that excessive fees are being charged or that the organizations are operating detrimentally to the public interest.

## Oil Production In Alberta

April Showed Fifty Per Cent. Gain Over Same Month Last Year

Oil production in Alberta for the month of April was more than 50 per cent. ahead of the same month last year. According to figures given by Hon. R. G. Reid, Minister of Lands and Mines, the four producing fields in the province gave a yield of 142,544 barrels, as against 92,494 barrels in April of 1930. The heaviest item in the month's production was 123,533 barrels of naphtha from Turner Valley wells, this alone being an advance of nearly 50,000 barrels over the corresponding month last year. Turner Valley also produced 1,626 barrels of light crude oil, while light crude from Red Coulee was 6,800 barrels. In the heavy crude class, Wainwright contributed 1,306 barrels, and Hinton 270 barrels.

The tailored pulgum is a new beige washable suit crepe silk. It's a dress that offers such a decided change to wardrobe for immediate wear. It will be found especially lovely for the summer.

Style No. 187 may be made in 30 inches bust. Size 16 requires 2 yards 30-inch material, for dress. Size 18 requires 2 yards 30-inch material for blouse and 2 yards of binding. Wood jersey in guerdaine blue with white jersey piping is jaunty.

A plaided crepe silk with plain blending crepe is extremely modish. Crepe woolens, linen, wool challis prints and tweed-like cottons are ideally suited to this model.

Pattern price 25 cents in stamps or coin (coin is preferred). Wisp coin carefully.

## Was Pioneer Agriculturist

Late Dr. Angus MacKay Was Originator Of Better Methods Of Farming On the Prairies

Dr. Angus MacKay, 91, veteran Saskatchewan agriculturist, who died recently at Indian Head, was among the first contingent of settlers which came from Ontario when the Canadian Pacific Railway opened in Manitoba.

With three companions, William Miller and Bion, Saskatchewan's pioneer agriculturist was one of the founders of the first co-operative enterprise in western Canada. It was with these three that Dr. MacKay formed a company, with the four as shareholders when he arrived at Indian Head, a 150-mile journey from the nearest rail line.

For half a dozen years these men worked together until the Dominion government undertook to establish an experimental farm in the west. This was in 1887, and a year later a farm of 600 acres was purchased from a company which owned a much larger tract in the Qu'Appelle district. Angus MacKay was called on by the government to give assistance in the choosing of land for the new venture in the west and he it was who became superintendent.

For 26 years he held the position and in 1913 was retired. Ever since he had taken keen interest in agricultural problems and had been recipient of many honours. At convocation on May 5, 1922, the degree of LL.D. was conferred on him by the University of Saskatchewan.

Educated in the Old Whittby Grammar school in the town where he was born, MacKay spent the first 12 years of his long life in the east. He was military service during the time of the Fenian raid when he was lieutenant in the 34th regiment of Foot.

With several others he was known as the originator of better methods of farming on the prairie. He shares the credit for the position western Canada holds in the world as a great wheat producing area. With his colleague, Hon. Dr. W. R. Motherwell, MacKay preached the gospel of conservation of moisture, better cultivation, intelligent farming and restoration of varieties of grain.

The experimental farm at Indian Head stands a living monument of his work in the west.

In his immediate family Dr. MacKay is survived by his widow, two sons, Donald G. and Robert G. MacKay, and one daughter, Agnes M. MacKay, all of Indian Head.

## Airplane Speed Records

Within the next ten years aeroplanes will be able to fly twelve or fifteen miles above the earth where speeds of more than 1,000 miles an hour are conceivable, says Capt. J. H. Hedley, British flyer, in citing the possibilities of a "trip around the world in twenty-four hours. However, one must take into account one drawback, the horizon recedes rapidly, the greater is the distance around the earth.

"There are more than 55,000 doctors registered in Great Britain."

Such labor! Such refreshing fragrance, such skin softening and cleansing.

## Gandhi Prefers Humble Quarters in London

Chooses To Live In Garret Among the Poorer Class

Mahatma Gandhi, who will leave India about the middle of August to attend meetings of the federal structures committees in London, England, has decided that when he gets there he will live among the most humble mendicants of King'sley Hall, London's east-end and the poor.

While India's other delegates to the round table conference insist themselves on the finer hotels or the castles of their friends, he will be in a garret among surroundings not unlike those familiar to the people who revere him so highly at home.

If the weather permits he will not even alter his habitual costume of white shawl and thin cotton loin cloth, but if it is cold he will wear a homespun coat and the conventional European trousers. When he appears before the King and Queen it will be in the Indian costume with shaven head and bare feet.

Despite the problems of state with which he is concerned, one of his major considerations at the moment is how he will obtain fresh goat's milk in London, England, and on the way there. Contrary to reports he cannot take his own flock of goats which are milked twice daily in his presence, and it is likely he will instruct Miss Shide, his British attendant and disciple, to take along a supply of condensed milk.

## Larger Boats On Welland Canal

Boats up to 450 feet in length will be allowed to pass through the Welland Ship Canal, commencing this month, Chief Engineer Alex. Grant announced. Previous regular passage has been restricted to boats of the St. Lawrence size, 237 feet, any boats in excess of that have required a special pass. This new regulation will cover all classes of vessels, Mr. Grant announced, but the restriction to 15 feet draught will remain in force.

## TO GET RID OF CONSTIPATION

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

## WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE  
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

### Local Items

Mr. and Mrs. Henry Kitchen, Mrs. John Kitchen, Dorothy and George left last Saturday on a motor trip to Banff.

J. Male is at present in the hospital suffering from an infected foot, the result of an accident while at his work in the glass plant.

Geo. Slemco, who a few years ago ran a barber shop here, has purchased the building on third street previously owned and occupied by Jas. Belisle. Mr. Slemco intends returning to Redcliff and going into business.

There have been many complaints from football fans because of the lack of advertising for the last few games. The small crowd at the last two games shows that it pays to advertise.

Last Tuesday evening the Redcliff junior football team went to Medicine Hat and trimmed the juniors if that city 4 to 3 in a friendly game. Those who saw it say both teams put up a splendid argument which was well worth seeing. The lads should be encouraged by all senior teams.

An ice cream social will be held on Wednesday afternoon at 3 p.m. 22nd of July by St. Ambrose S.W.A. on Mrs. Grieve's lawn on 4th street. Also sale of home cooking followed by an evening whist drive at 8 p.m. Admission 25 cents. Come and have a good time. All are welcome, good prizes. Pretty little childrens dresses will be offered for sale.

Great credit is due to Evelyn Hicks for getting a tennis court started in town.

A week ago Evelyn got the idea that to vacant lot next their store could be put to some use and with hoe and rake she got busy to clean it of weeds, and lay it out for a tennis court. The result is that the court is now completed, and the young folk have been enjoying this popular outdoor game for the past few days. Now everybody is saying "ata girl Evelyn"

## World's Grain Exhibition and Conference

## Farmers Will Win \$210,750.00 in Prizes

The World's Grain Exhibition and Conference offer Canadian farmers an opportunity to share in cash prizes amounting to \$210,750.00. Computed in 50 competitive classes, open to the whole world, are 1,703 cash prizes. A few of the major awards follow:  
\$7,500.00 first prize for 50 pounds of wheat, 30 pounds of oats,  
\$1,500 for 40 pounds of barley, 50 pounds of rye,  
\$500 for 10 tons of corn,  
\$300 for 30 pounds of peas, 30 pounds of flax,  
50 pounds of clover.

With this splendid opportunity before them, Canadian farmers should keep a watchful eye on their growing crops. They should mark for special care those areas that appear most promising. It should be understood that all seed and grain samples, if they are not already selected, will have to be turned in crops of this year. All exhibits must be received by the Exhibition authorities on or before March 1, 1932.

Of vital importance to the advancement of Canadian agriculture will be the winning of World Championships in 1932 by farmers of Canada. They and their grain exhibits must demonstrate to the world the quality of Canada's field crops.

Select the classes from the prize list most suited to the crop you grow, then select your samples from the best you have. It is best to make your entry NOW.

Your sample for exhibit must be in the hands of the Secretary at Regina on or before March 1, 1932.

Valuable information relating to the preparation of grain and seed for exhibit may be secured by writing to the Secretary of the Exhibition and Conference, World's Grain Exhibition and Conference, care Department of Agriculture, your own province.

Show what you grow and share what you know

On exhibition, and competing, World's Grain Exhibition and Conference, located at Medicine Hat, Alberta, will give you lots, help and replace your own competitive entries and all other information.
